GLOBAL DATA

## Fast Facts

- Over two-thirds of the world's 793 million illiterate adults are found in only eight countries (India, China, Bangladesh, Pakistan, Nigeria, Ethiopia, Brazil and Egypt).
- Of all the illiterate adults in the world, two-thirds are women.
- Extremely low literacy rates are concentrated in three regions, South and West Asia, SubSaharan Africa, and the Arab states, where around one-third of the men and half of all women are illiterate.
- Globally, 570 million children are enrolled in school.
- The number of children of primary school age who were out of school fell from 103 million in 1999 to 73 million in 2006. In that year, primary school enrollment in developing countries reached 88\% on average, up from 83\% in 2000.
- In sub-Saharan Africa, the net primary school enrollment ratio has only recently reached $71 \%$, even after a significant jump in enrollment that began in 2000. Around 38 million children of primary school age in this region are still out of school.
- In Southern Asia, the enrollment ratio has climbed above 90\%, yet more than 18 million children of primary school age are not enrolled.
- Projections suggest that without further acceleration, 58 out of the 86 countries that have not yet reached universal primary education will not achieve it by 2015.

Source: UNESCO Institute for Statistics, for 2005-2009

With lower literacy rates and a large illiterate population, notably among younger people, emerging Asian countries will face the challenge of educating a large, growing and active population.

India itself represents as much as $36 \%$ of the world's illiterate adult population.

## Education Index

## Education Index World Map- 2011

Source: UNESCO Institute for Statistics

The Education Index is measured by the adult literacy rate (with two-thirds weighting) and the combined primary, secondary, and tertiary gross enrollment ratio (with one-third weighting). The adult literacy rate gives an indication of the ability to read and write, while the Gross Enrollment Ratio (GER) gives an indication of the level of education from kindergarten to postgraduate education.

Education is a major component of well-being and is used in the measure of economic development and quality of life, which is a key factor in determining whether a country is a developed, developing, or underdeveloped country.

| Country | $\Delta$ Value Since |

Source: OECD PISA Scores, 2009
OECD's Programme for International Student Assessment (PISA) helps monitor student achievement on a regular basis within an internationally accepted common framework, and allows compare students across countries. Every three years, PISA collects information on student achievement and contextual information about students, teachers and schools, and derives educational indicators that can monitor differences (and similarities) over time.

The United States failed to make the top 25 of Math category and performed low in Science and Reading.

## Education Attainment in OECD Countries

## Secondary Education Completion Rate in Select OECD Countries (2009)

| Country | Upper Secondary <br> Grad. Rate | Based on current patterns of graduation, it is estimated <br> that an average of $82 \%$ of today's young people in <br> OECD countries will complete upper secondary <br> education over their lifetimes. For G20 countries, the |
| :--- | :--- | :--- |
| rate is lower, at $75 \%$. |  |  |

Source: OECD

## Tertiary Education Completion Rate in Select OECD countries (2009)

| Country | Tertiary Education <br> Completion rate <br> (as \% of 25-64 age <br> population) |
| :--- | :---: |
| 1 Canada | $49.5 \%$ |
| 2 Israel | $44.9 \%$ |
| 3 Japan | $43.8 \%$ |
| 4 United States | $41.2 \%$ |
| 5 New Zealand | $40.1 \%$ |
| 6 Korea | $38.8 \%$ |
| 7 Finland | $37.3 \%$ |
| 8 Australia | $36.9 \%$ |
| 9 United Kingdom | $36.9 \%$ |
| 10 Norway | $36.7 \%$ |
| 11 Estonia | $36.0 \%$ |
| 17 Sweden | $33.0 \%$ |
| 18 Netherlands | $32.8 \%$ |
| 19 Iceland | $32.8 \%$ |
| $\quad$ OECD average | $29.9 \%$ |
| 20 Spain | $29.7 \%$ |
| 21 France | $28.9 \%$ |
| 22 Germany | $26.4 \%$ |

If current tertiary attainment rates among 25-34 year-olds are maintained, the proportion of adults in France, Ireland, Japan and Korea who have a tertiary education will grow more than that of other OECD countries, while that proportion in Austria, Brazil and Germany will fall further behind other OECD countries.

More than 255 million people in OECD and G20 countries with available data now have a tertiary education. While the level of tertiary attainment in China is still low, because of the size of its population, China still holds some $12 \%$ of all tertiary graduates, compared with 11\% in Japan and 26\% in the USA.

In 1998, on average across OECD countries, $37 \%$ of 25-64 year-olds had not completed upper secondary education, $42 \%$ had completed upper secondary and post-secondary non-tertiary education, and another $21 \%$ had completed tertiary education. By 2009, the proportion of adults who had not attained an upper secondary education had fallen by $10 \%$, the proportion with a tertiary degree had risen by $9 \%$, and the proportion with upper secondary and postsecondary non-tertiary education had increased marginally, by $2 \%$.

## Total Expenditures of Educational Institutions and \% of GDP

| School <br> Year | Total Expenditure <br> (in \$, B) | $\%$ <br> of GDP |
| :---: | :---: | :---: |
| $1981-82$ | 190.8 | $6.1 \%$ |
| $1982-83$ | 204.7 | $6.3 \%$ |
| $1983-84$ | 221.0 | $6.3 \%$ |
| $1984-85$ | 239.4 | $6.1 \%$ |
| $1985-86$ | 259.3 | $6.1 \%$ |
| $1986-87$ | 281.0 | $6.3 \%$ |
| $1987-88$ | 301.8 | $6.4 \%$ |
| $1988-89$ | 333.2 | $6.5 \%$ |
| $1989-90$ | 365.8 | $6.7 \%$ |
| $1990-91$ | 395.3 | $6.8 \%$ |
| $1991-92$ | 417.9 | $7.0 \%$ |
| $1992-93$ | 439.7 | $6.9 \%$ |
| $1993-94$ | 460.8 | $6.9 \%$ |
| $1994-95$ | 485.2 | $6.8 \%$ |
| $1995-96$ | 508.5 | $6.9 \%$ |
| $1996-97$ | 538.9 | $6.9 \%$ |
| $1997-98$ | 570.5 | $6.8 \%$ |
| $1998-99$ | 603.8 | $6.9 \%$ |
| $1999-00$ | 649.3 | $6.9 \%$ |
| $2000-01$ | 705.0 | $7.1 \%$ |
| $2001-02$ | 752.8 | $7.3 \%$ |
| $2002-03$ | 795.7 | $7.5 \%$ |
| $2003-04$ | 830.3 | $7.5 \%$ |
| $2004-05$ | 876.0 | $7.4 \%$ |
| $2005-06$ | 925.7 | $7.3 \%$ |
| $2006-07$ | 984.0 | $7.3 \%$ |
| $2007-08$ | $1,054.2$ | $7.5 \%$ |
| $2008-09 E$ | $1,080.0$ | $7.5 \%$ |
| $2009-10 \mathrm{E}$ | $1,111.0$ | $7.9 \%$ |

Total expenditures of educational institutions have steadily increased in both dollar term and percentage of GDP since 1980.

After adjustment for inflation, total expenditures for all educational institutions rose by $85 \%$ between 1997-98 and 2007-08.

$8^{\text {th }}$ graders' performance has shown little improvement since 1992 and virtually no change since 2002.
Females consistently score higher than male students.
White and Asian/Pacific Islanders $8^{\text {th }}$ graders scores higher than Black and Hispanic $8^{\text {th }}$ graders, a trend that will later be reflected in graduation and dropout rates (Dropout rates, by race/ethnicity, in page 47)

The number of public elementary and secondary school teachers rose by $15 \%$ between 1998 and 2009. The number of public school teachers has risen faster than the number of students during that period, resulting in declines in the pupil/teacher ratio. In the fall of 2008, there were 15.3 public school pupils per teacher compared with 16.4 public school pupils per teacher in 1998. The pupil/teacher ratio in private schools was projected at 13.1 pupils per teacher for fall 2009.

## Estimated Avg. Annual Salary for Public K-12 Teachers

| Year | All <br> Teachers | Elementary <br> Teachers | Secondary <br> Teachers |
| :---: | :---: | :---: | :---: |
| $1970-71$ | $\$ 50,081$ | $\$ 48,746$ | $\$ 51,702$ |
| $1975-76$ | 48,770 | 47,531 | 50,074 |
| $1980-81$ | 43,722 | 42,696 | 44,956 |
| $1985-86$ | 49,709 | 48,760 | 50,985 |
| $1990-91$ | 53,031 | 52,079 | 54,332 |
| $1995-96$ | 52,299 | 51,598 | 53,348 |
| $2000-01$ | 53,180 | 52,606 | 54,008 |
| $2003-04$ | 53,686 | 53,277 | 54,187 |
| $2004-05$ | 53,209 | 52,767 | 53,401 |

## Homeschooling

## General Facts and Trends

- There were an estimated 1.73 M to 2.35 M children (in grades K to 12 ) home educated during the spring of 2010 in the United States. The home school population is continuing to grow (at an estimated $2 \%$ to $8 \%$ per annum over the past few years).
- Homeschooling is quickly growing in popularity among minorities. About $15 \%$ of home school families are non-white/non-Hispanic.

## Reasons for Home Educating

- Customize or individualize the curriculum and learning environment for each child.
- Accomplish more academically than in schools.
- Use pedagogical approaches other than those typical in institutional schools.
- Enhance family relationships between children and parents and among siblings.
- Provide guided and reasoned social interactions with youthful peers and adults.
- Provide a safer environment for children and youth, because of physical violence, drugs and alcohol, psychological abuse, and improper and unhealthy sexuality associated with institutional schools.
- Teach and impart a particular set of values, beliefs, and worldview to children and youth.

## Academic Performance

- The home-educated students typically score 15 to 30 percentile points above public-school students on standardized academic achievement tests. (Percentiles range from 1 to 99 on these tests.)
- Home school students score above average on achievement tests regardless of their parents' level of formal education or their family's household income.
- Whether home school parents were ever certified teachers is not related to their children's academic achievement.
- Home-educated students typically score above average on the SAT and ACT tests that colleges consider for admissions.
- Home-school students are increasingly being actively recruited by colleges.

College Graduation Rate, by Gender

Source: US Department of Education
Similar to the trend observed in high school graduation rates, women are now graduating from a college at a higher rate than men and the graduation rate gap has been increasing in recent years.

College Graduation Rate, by Race/Ethnicity (in \%)

Source: ies NSF Survey, 2008
With a $35.5 \%$ college graduation rate, White students fare better than the national average of $29.6 \%$. Black students and Hispanic students show increased graduation rates of $19.5 \%$ and $11.6 \%$, respectively.

## Associate's and Bachelor's Degrees Conferred and Percentage of Bachelor's Degrees Awarded to Females

| Year | Degree |  | \% of Bachelors <br> awarded to |
| :---: | :---: | ---: | :---: |
|  | Associate | Bachelor | females |
| $1969-70$ | 206,023 | 792,316 | 43.1 |
| $1979-80$ | 400,910 | 929,417 | 49.0 |
| $1984-85$ | 454,712 | 979,477 | 50.7 |
| $1989-90$ | 455,102 | $1,051,344$ | 53.2 |
| $1991-92$ | 504,231 | $1,136,553$ | 54.2 |
| $1993-94$ | 530,632 | $1,169,275$ | 54.5 |
| $1995-96$ | 555,216 | $1,164,792$ | 55.1 |
| $1997-98$ | 558,555 | $1,184,406$ | 56.1 |
| $1999-00$ | 564,933 | $1,237,875$ | 57.2 |
| $2001-02$ | 595,133 | $1,291,900$ | 57.4 |
| $2003-04$ | 665,301 | $1,399,542$ | 57.5 |
| $2004-05$ | 696,660 | $1,439,264$ | 57.4 |

## DISTANCE/ONLINE LEARNING

## Fast Facts

- According to the International Association for K-12 Online Learning (iNACOL) data published in 2012, 40 states have state virtual schools or state-led initiatives and 30 states, (including Washington, DC) have statewide full-time online schools.
- In 2009-10, there were an estimated 1.8 M enrollments in online courses in K - 12 school districts. In addition to this, there are an estimated 200,000 students enrolled in most full-time online schools.
- The current average per pupil expenditures for a fully online model is $\$ 6,400$ and for a blended-learning model is $\$ 8,900$ and for a traditional school model is $\$ 10,000$.
- As of late 2011, no state has a full suite of full-time and supplemental online course options for students at all grade levels.
- According to the Sloan Consortium, the overall number of postsecondary students engaged in online courses in 2010-2011, is estimated at 6.1 M , an increase of 560 K students over the number reported the previous year and $31 \%$ of all higher education students now take at least one course online.

Postsecondary Online Enrollment Growth and Projection

Source: Eduventures and BMO Capital Market Estimates
There were an estimated 2.7M students enrolled in fully online postsecondary programs in 2010-2011. The ratio of fully online students has increased from around $1.2 \%$ of all students enrolled in degree-granting postsecondary institutions in 1999-2000, to about $13.5 \%$ in 2010-11. Online enrollment is estimated to increase at CAGR $5.5 \%$ to 3.44 M in 2015 , forming $15.9 \%$ of the total postsecondary enrollment.
